TANISHA JAVERI

Chicago, IL 60626 | tanisha10097@gmail.com | 312-292-8970

PROFILE

Environmental Studies undergraduate interested in scientific data analysis, remote sensing, ocean science, and atmospheric research. Uses Python to explore environmental scenarios and communicate results clearly. Completed NASA ARSET training in remote sensing and air quality applications.

EDUCATION

Loyola University Chicago | Bachelor of Arts in Environmental Studies | Expected May 2028

TECHNICAL SKILLS

Python | Scenario modeling | Data interpretation | Data visualization | Research communication | Remote sensing fundamentals | Air quality applications

SELECTED PROJECT

Sea Level Rise and Coastal Flood Exposure | Python scenario model

• Developed an educational Python model comparing coastal flood exposure across five fictional locations under different sea-level rise scenarios.

• Explored +1 m and +3 m scenarios, created visualizations, and prepared downloadable results; clearly documented assumptions and limitations.

• Identified future opportunities to incorporate observational and elevation datasets for more realistic analysis.

NASA TRAINING & CERTIFICATIONS

NASA Applied Remote Sensing Training (ARSET) — Certificates of Completion

• Fundamentals of Remote Sensing

• Fundamentals of Remote Sensing for Air Quality Applications

ENVIRONMENTAL RESEARCH & COMMUNITY EXPERIENCE

Environmental Science Volunteer | Bezazian Branch, Chicago Public Library | Feb–Apr 2024

• Researched ocean conservation and greenhouse gas reduction strategies for public education.

• Presented findings and created visuals to communicate environmental topics to community members.

ADDITIONAL STRENGTHS

Scientific curiosity | Written and verbal communication | Team collaboration | Attention to detail | Independent learning
